

HepcoMotion exhibiting at SIANE 2019

<https://www.hepcotion.com/blog/latest-news/hepcotion-exhibiting-at-siane-2019/>

HepcoMotion, a leading producer of high quality linear and ring guide systems since 1969, is pleased to be back at SIANE, Toulouse, taking place 22-24 October 2019. SIANE is one of the leading exhibitions in the South of France, bringing together the Who's Who in industrial production.

HepcoMotion will be showcasing a selection of its successful product range, in particular, examples of the V guide linear system range, GV3, with the new addition of the Side Access Adjustment carriage (SAA). The SAA facilitates the adjustment of its bearings and simplifies the removal of the carriage plates which can provide flexibility for applications.

This year, HepcoMotion is particularly pleased to present a Stäubli exhibition cell at its stand. The cell showcases the potential of modern technology in conjunction with solid, cutting edge high quality linear guide systems. The abilities of Stäubli's robotic arms come fully to the fore, thanks to HepcoMotion's GFX system, in conjunction with the Beckhoff linear motor system XTS. Jointly, these two systems are able to deal with higher payloads at great speeds, while maintaining absolute precision.

Visit Hepco at stand 4K16 in Hall 4, where you will also have the opportunity to chat with our sales engineers about your applications.
