

HepcoMotion set to make its debut appearance at Drives & Controls

<https://www.hepcotion.com/blog/latest-news/hepcotion-set-to-make-its-debut-appearance-at-drives-controls/>

Linear motion expert HepcoMotion will be making its debut appearance at Drives & Controls, the UK's leading event for drives, automation, power transmissions and motion control at the NEC Birmingham on the 21st-23rd April 2020. From track systems for robot automation, to heavy duty systems for high loads, to a host of smaller components to perform simple or complex operations, HepcoMotion has a product to meet practically any requirement.

For creative automation solutions, visitors will be able to see the highly-regarded GFX Hepco Guidance for Beckhoff XTS (eXtended Transport System). This solution utilises Hepco's PRT2 and 1-Trak guidance systems to work with Beckhoff's XTS circuit linear system to meet the needs of higher duty XTS applications where motion profiles and long-term durability requirements are particularly demanding. The combination of technologies from market leaders Beckhoff and Hepco provides users with a robust, high production and flexible solution that will revolutionise production processes in many manufacturing applications. This system is ideally suited to a range of applications, such as a variable speed lane divider to sort randomly positioned items into separate lanes, or a double-sided system for a compact application that requires multiple motion profiles.

With Hepco's experienced team on hand to discuss applications and product offerings, Hepco looks forward to meeting visitors on stand D200 at the NEC.
