HepcoMotion's range of linear and circular motion products play a key role in optimizing production processes – a core driver for every design engineer. At PPMA Total Show 2019, which takes place from 1st-3rd October at the NEC, Birmingham, HepcoMotion will showcase some of its industry leading products ideally suited to machine automation.

For creative solutions in processing and packaging automation, visitors will be able to see the highly-regarded GFX Hepco Guidance System for Beckhoff XTS (eXtended Transport System). This solution utilises Hepco's PRT2 and 1-Trak guidance systems to work with Beckhoff's XTS circuit linear system to meet the needs of higher duty XTS applications where motion profiles and long-term durability requirements are particularly demanding. The combination of technologies from market leaders Beckhoff and Hepco provides users with a robust, high production and flexible solution that will revolutionise production processes in many manufacturing applications. This system is ideally suited to a range of applications, such as a variable speed lane divider to sort randomly positioned items into separate lanes, or a double-sided system for a compact application that requires multiple motion profiles. Widely used at the forefront of food packaging technology by customers such as Kliklok International for their revolutionary ITC system, GFX provides a high speed, high volume, low maintenance solution that can be easily be re-configured to suit different types of products.

With Hepco's experienced team on hand to discuss applications and product offerings, Hepco looks forward to meeting visitors at stand D40.
