HepcoMotion, one of the leading producers of high quality linear and ring guidance systems is pleased to be back at Germany's leading exhibition for the packaging industry. The trade show takes place from 24-26 September in Nuremberg, Germany.

HepcoMotion will present a selection of its innovative products, including the latest addition to its successful GV3 linear motion range. The new side access adjustment feature facilitates the adjustment of its bearings and simplifies the removal of the carriage plates which can provide flexibility for applications.

This year, HepcoMotion is particularly pleased to present a Stäubli exhibition cell at its stand. The cell showcases the potential of modern technology in conjunction with solid, cutting edge high quality linear guide system. The abilities of Stäubli's robotic arms come fully to the fore, thanks to HepcoMotion's GFX system, in conjunction with the Beckhoff linear motor system XTS. Jointly, these two systems are able to deal with higher payloads at great speeds, while maintaining absolute precision.

HepcoMotion's stand is located in hall 3, stand number 403. Visitors will be able to talk to our experienced sales engineers and attend daily product presentations.
