Tiverton-based engineering firm HepcoMotion is pleased to hold its annual Apprenticeship Recruitment Open morning at its headquarters in Lower Moor Business Park on Friday 13th March from 10-1pm. Aimed at students who are leaving college this year and considering applying for an apprenticeship, the recruitment open morning provides students with an opportunity to come and see for themselves what Hepco's industry-leading apprenticeship scheme offers.

An informal and informative morning, students will learn about HepcoMotion, a world-leading manufacturer of linear motion systems based in Tiverton. Students will have the opportunity to look around Hepco's facilities, meet some of their current apprentices and speak to some of their former apprentices, many of who are now in management positions.

Students will also enjoy a detailed tour of the factory, including visiting some of the many departments where apprentices spend their time learning engineering skills such as milling, turning, grinding, robotics, inspection, CAD modelling and CNC programming.

With a HepcoMotion Engineering Apprenticeship, apprentices will learn the skills required to become a fully qualified engineer and begin their career with industry-leading experience behind them. Indeed over one third of Hepco's senior management are former apprentices, highlighting the value Hepco place on apprentices.

For those interested in attending, please contact Human Resources on 01884 243400.

For further information on Hepco's well-renowned apprentice programme please visit www.hepcotion.com

Tiverton-based engineering firm HepcoMotion is pleased to hold its annual Apprenticeship

Recruitment Open morning at its headquarters in Lower Moor Business Park on Friday 9th March from 10-1pm. Aimed at students who are leaving school or college this year and considering applying for an apprenticeship, the recruitment open morning provides students with an opportunity to come and see for themselves what Hepco's industry-leading apprenticeship scheme offers.

An informal and informative morning, students will learn about HepcoMotion, a world-leading manufacturer of linear motion systems based in Tiverton. Students will have the opportunity to look around Hepco's facilities, meet some of their current apprentices and speak to some of their former apprentices, many of who are now in management positions.

Students will also enjoy a detailed tour of the factory, including visiting some of the many departments where apprentices spend their time learning engineering skills such as projects, milling, turning, bench fitting, CAD modelling and CNC programming after the initial two months spent with the Group Training Manager.

With a HepcoMotion Engineering Apprenticeship, apprentices will learn the skills needed to become a fully qualified engineer and begin their career with industry-leading experience behind them. All apprentices are guaranteed a job upon completion. Indeed over one third of Hepco's senior management are former apprentices, highlighting the value Hepco place on apprentices.

HepcoMotion offers two apprenticeship programmes; the Advanced programme is for school leavers and the Higher programme is for college leavers. For those interested in attending, please contact Human Resources by the 2nd March on 01884 243400.
